## 1. Introduction

*The following subsections of the Software Requirements Specifications (SRS) document provides an overview on the Document Search Engine, its purpose, scope, tools used, references, softwares and hardware requirements.*

### **1.1 Purpose**

*The purpose of this project is to build a Document Search Engine which allows users to efficiently search for required files. It will also provide usage statics about files and keep track of files.*

### **1.2 Scope**

*The proposed Document Search Engine can be used by a wide variety of users ranging from students, teachers, business professionals, or any random person or a group of people.*

### **1.3 Tools Used**

#### IDE – JetBrains PhpStorm 9.0

*JetBrains PhpStorm is a commercial, cross-platform [IDE](#) for [PHP](#) built on [JetBrains' IntelliJ IDEA](#) platform.*

*PhpStorm provides an editor for [PHP](#), [HTML](#) and [JavaScript](#) with on-the-fly code analysis, error prevention and automated [refactorings](#) for PHP and JavaScript code. PhpStorm's [code completion](#) supports PHP 5.3, 5.4, 5.5, 5.6 & 7.0 (modern and legacy projects), including [generators](#), [coroutines](#), the finally keyword, list in foreach, [namespaces](#), [closures](#), [traits](#) and short array syntax. It includes a full-fledged [SQL](#) editor with editable query results.*

#### IDE - Android Studio

*Android Studio is the official [integrated development environment](#) (IDE) for [Android](#) platform development.*

*Based on [JetBrains' IntelliJ IDEA](#) software, Android Studio is designed specifically for Android development. It is available for download on [Windows](#), [Mac OS X](#) and [Linux](#), and replaced [Eclipse Android Development Tools](#) (ADT) as Google's primary IDE for native Android application development.*

Web Server – Apache on XAMPP

*Apache HTTP Server*, colloquially called *Apache*, is the world's most used [web server](#) software.

Apache supports a variety of features, many implemented as [compiled modules](#) which extend the core functionality. These can range from server-side programming language support to authentication schemes. Some common language interfaces support [Perl](#), [Python](#), [Tcl](#), and [PHP](#).

Framework – Slim

*Slim* is a PHP micro framework that helps you quickly write simple yet powerful web applications and APIs.

Database – MySQL on XAMPP

*MySQL* is an [open-source relational database management system](#) (RDBMS); in July 2013, it was the world's second most widely used RDBMS, and the most widely used open-source [client-server model](#) RDBMS.

Design tool - ArgoUML

*ArgoUML* is an [UML](#) diagramming application written in Java and released under the [open source Eclipse Public License](#). By virtue of being a [Java](#) application, it is available on any platform supported by Java.

Postman

*Postman* is a tool used to test APIs.

**1.4 References**

- Java docs - <https://docs.oracle.com/javase>
- Wikipedia – <http://www.wikipedia.com>
- Php – <http://www.php.net>
- Android – <http://developer.android.com>

**1.5 Technologies to be used**

- Database – MySQL
- Java - Android
- Php – Php Hypertext Preprocessor
- HTML – Hyper Text Markup Language
- CSS – Cascading Style Sheets

- *XML – Android*
- *AJAX – Asynchronous JavaScript and XML*

## **1.6 Software Interface**

*Client on Internet*

*Web Browser, Operating System (any)*

*Application, Android*

*Web Server*

*Apache on XAMPP, Operating System (any)*

*Database*

*MySQL on XAMPP, Operating System (any)*

*Development End*

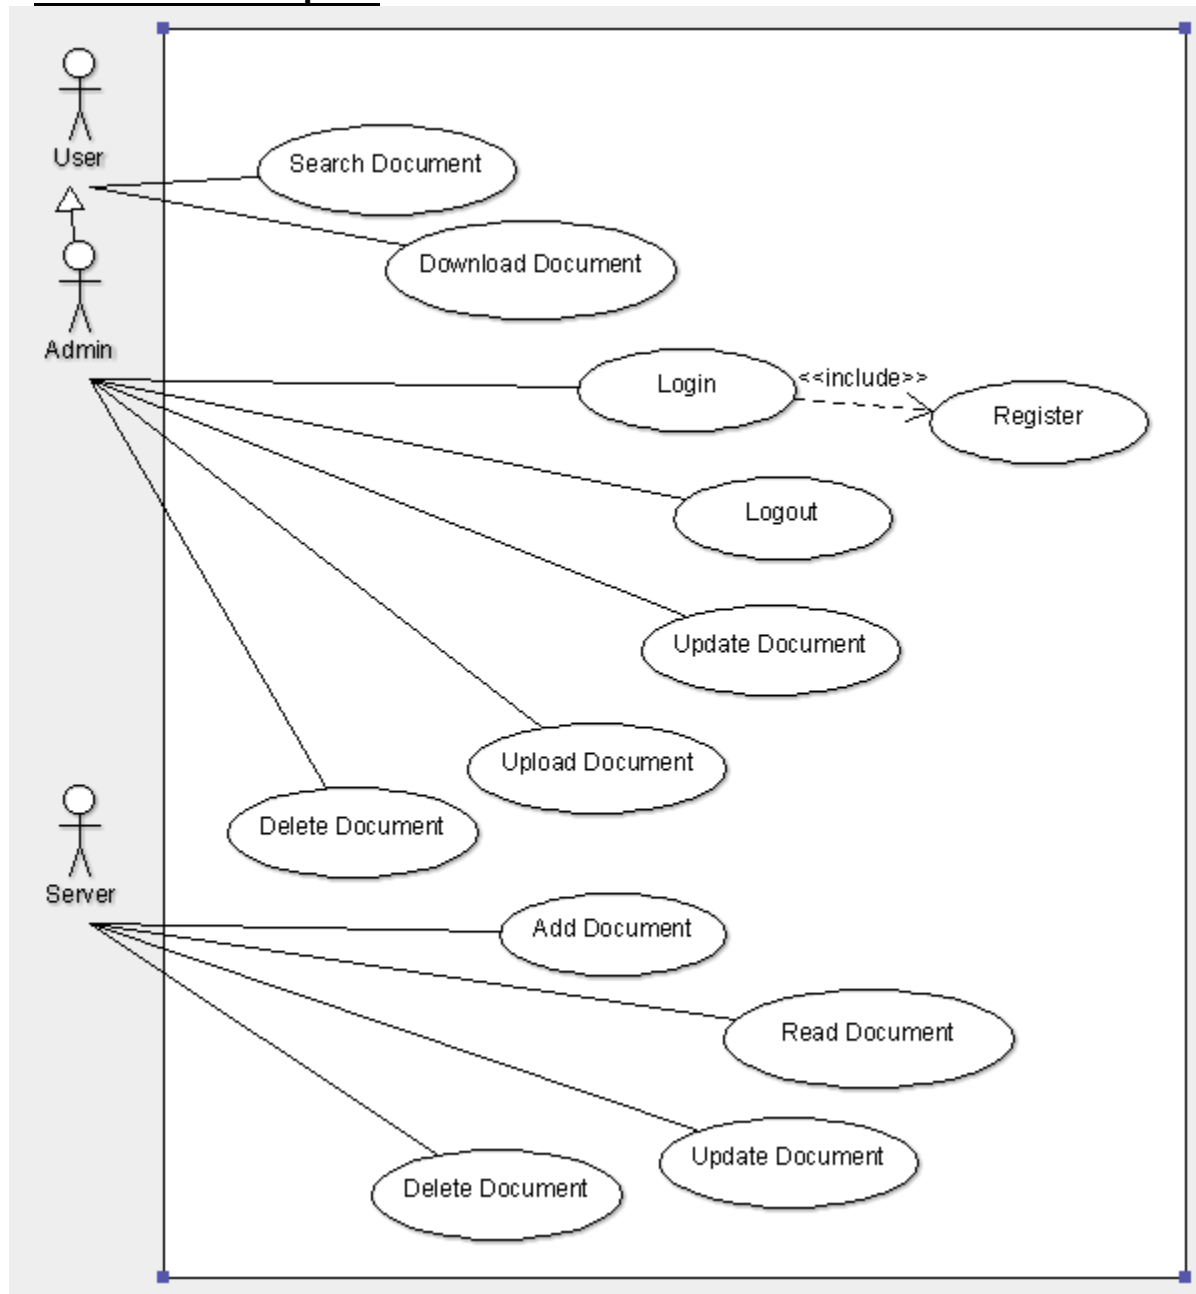

*Java(Android), XML(Android), HTML, PHP, MySQL, JavaScript, CSS,  
OS(Windows)*

## **1.7 Hardware Requirements**

<b>Application</b>	<b>Processor</b>	<b>RAM</b>	<b>Disk Space</b>	<b>Operating System</b>
<b>Browser</b>	800 MHz or above	1 GB or above	100 MB or above	Windows/Linux
<b>Android App</b>	800 Mhz or above	1 GB or above	50 MB or above	Android OS

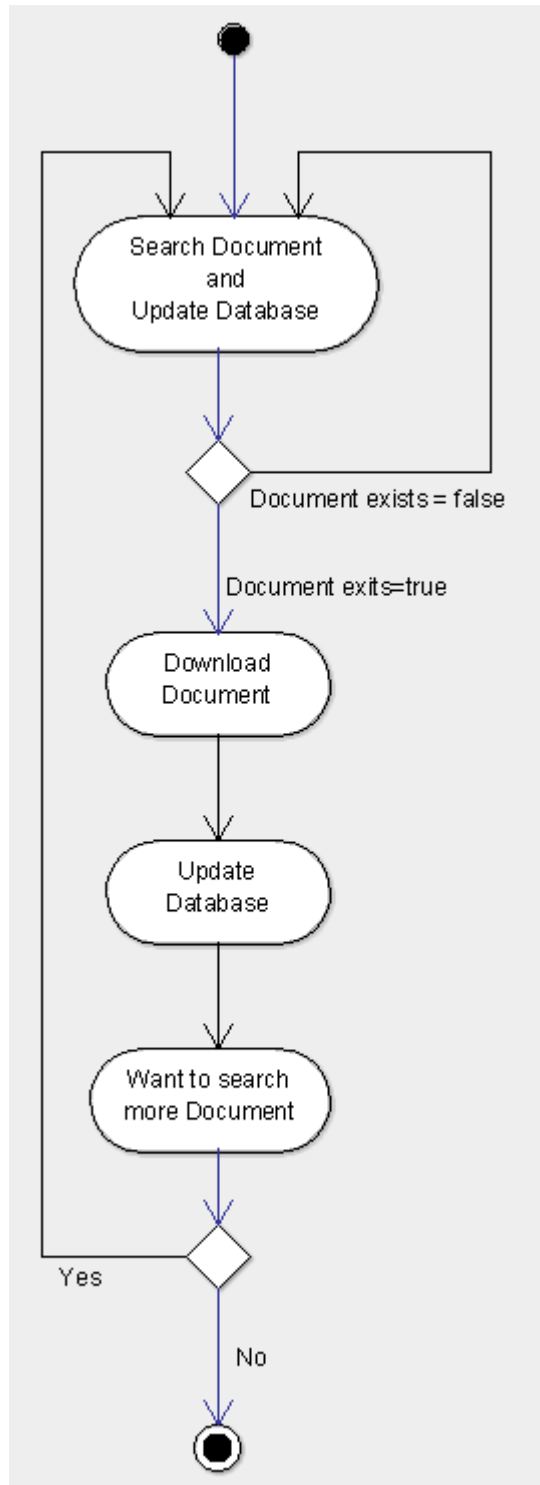

## 2. Specific Requirements

### 2.1 Use – Case Reports

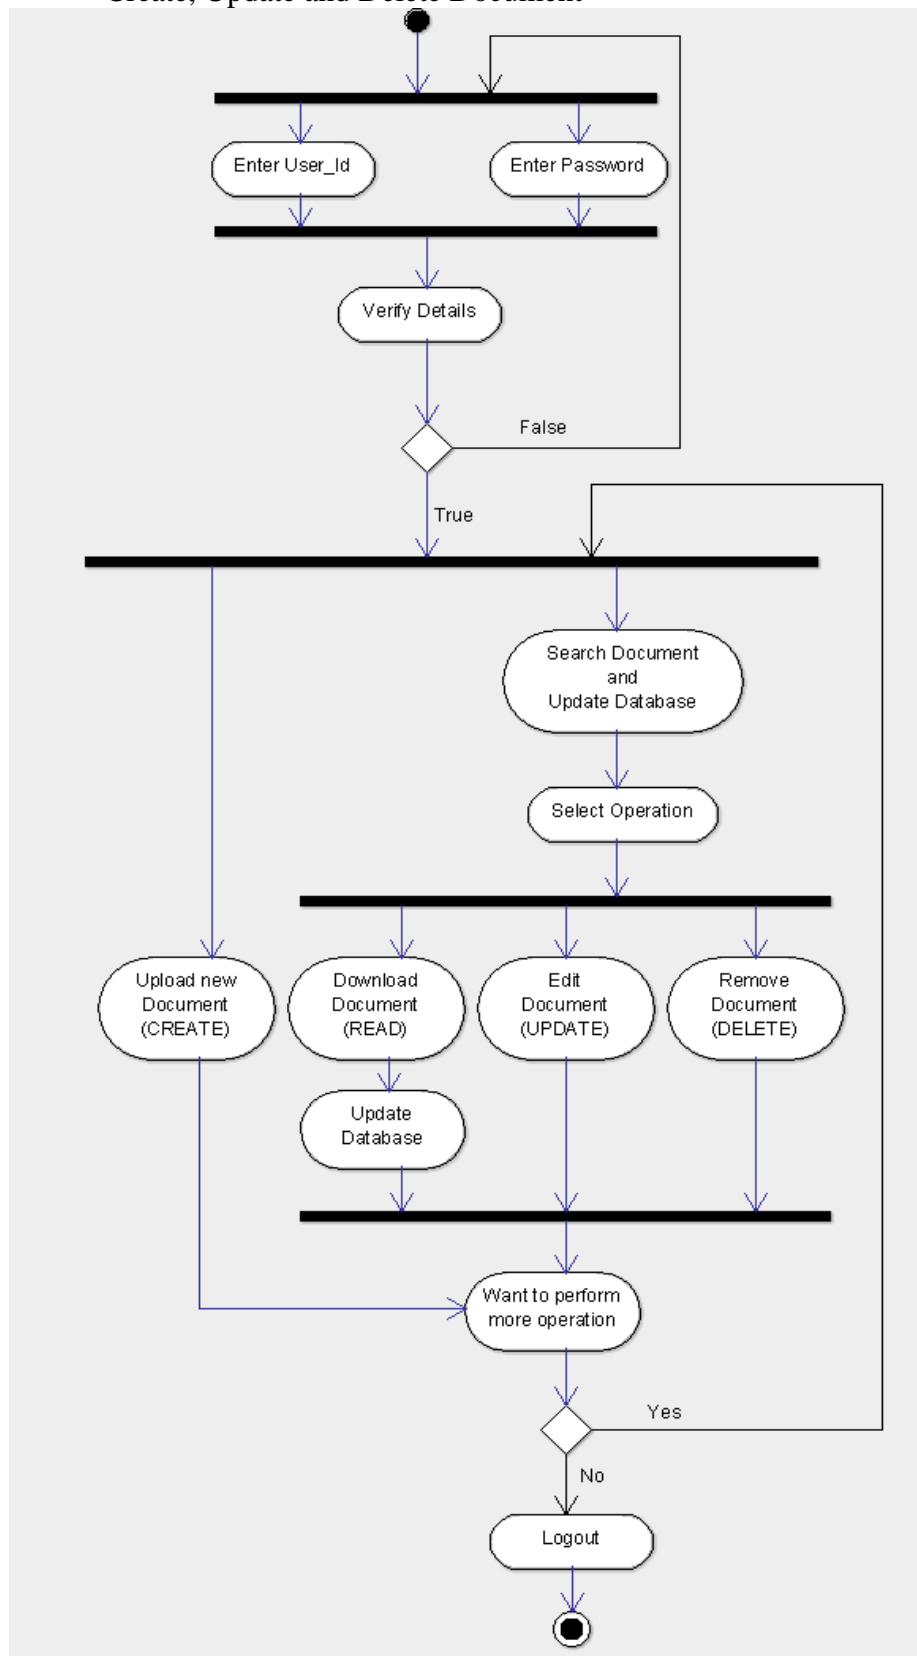

## 2.2 Activity Diagrams

### Search and Download Document

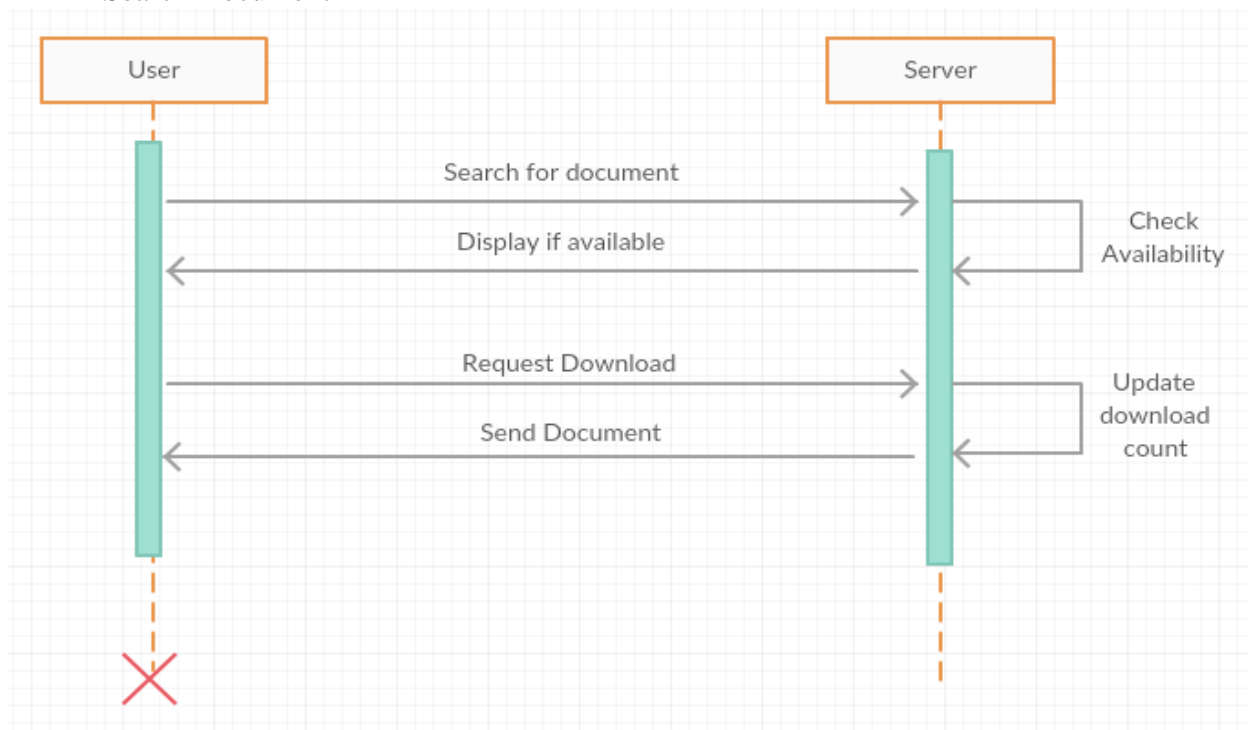

## Create, Update and Delete Document

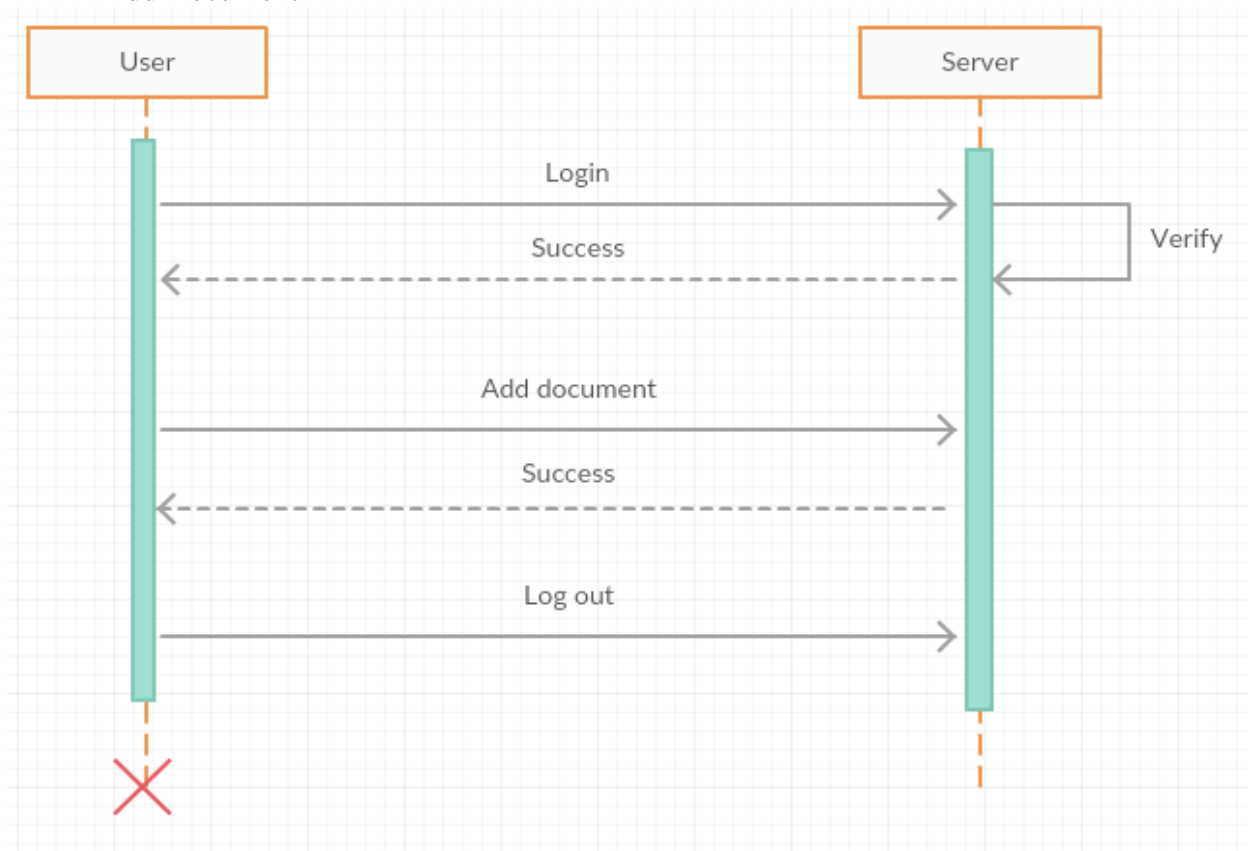

## 2.3 Sequence Diagrams

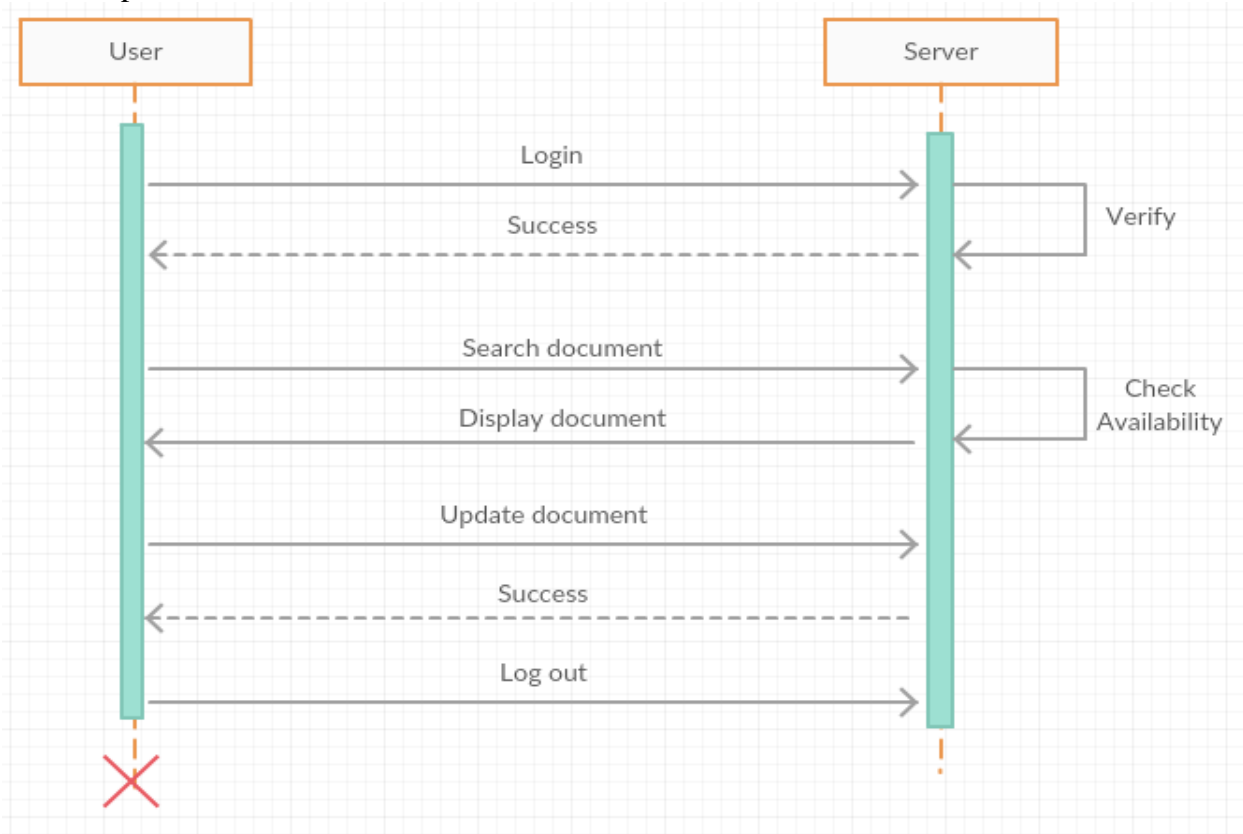

### Search Document

### Add Document

## Update Document

## Delete Document
